### DETAILED ACTION

Due to the complex nature of the claims, no request for an oral election is being made. Please MPEP 812.01.

#### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3, 9-11, drawn to method of inducing cytotoxicity in a neoplastic cell and compositions, classified in class 514, subclass 2+.
  - II. Claims 4-6, drawn to a composition comprising an isolated polynucleotide, classified in class 536, subclass 22.1.
  - III. Claim 7, drawn to a recombinant vector, classified in class 435, subclass 320.1.
  - IV. Claim 8, drawn to host cell, classified in class 435, subclass 325.
2. Groups I-IV are patentably distinct. Group I is drawn to a method which requires the administration of compositions containing polypeptides. Group II is drawn to compositions containing nucleotide sequences. Finally, Groups III and IV are drawn to structurally distinct "agents". The search for one group is not required for the other.
3. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention: **(GROUP I)** a method of administering compositions containing (1) a

Art Unit: 1614

polypeptide comprising SEQ ID NO:3; or (2) the amino acid sequence of the polypeptide encoded by the human cDNA of clone 117-005-2-0-E10-FLC(ECACC Accession No. 99061735; (**GROUP II**) a composition comprising (1) an isolated polynucleotide comprising a nucleotide sequence encoding the polypeptide of SEQ ID NO: 3 or (2) a nucleotide sequence which encodes the GSSP-2 polypeptide encoded by the human cDNA of clone 117-005-2-0-E10-FLC(ECACC Accession No. 99061735. If Applicant elects GROUP I either species (1) or (2) must then be elected. If Applicant elects GROUP II then either species (1) or (2) must also be elected.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 4 and 9 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1614

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cybille Delacroix-Muirheid whose telephone number is (703) 306-3227. The examiner can normally be reached on Tue-Fri from 8:30 to 6:00. The examiner can also be reached on alternate Mondays.

Art Unit: 1614

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax phone number for this Group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1235.
